Vertical Blinds

www.fashionline.com.au

The sleek design of vertical blinds not only makes a fabulous fashion statement but has built in practicality that makes them one of the most adaptable window treatments around. For rooms with beautiful views that still need light and heat protection, rooms with outlooks you would rather not see, or windows that are not standard in shape and are difficult to cover or coordinate with other window treatments, vertical blinds are your ideal solution.

You can precisely control the level of light that comes into your home and the degree of privacy with clever blades of fabric that can tilt to reveal or obscure the world outside. The blades draw like a curtain and can stack neatly to the right, left or centre to set the mood just as you want it. Open them, close them, or set them to a partial reveal. Verticals give you amazing versatility.

Achieve effortless elegance with your choice of color and texture from the huge range of fabrics available. You also have the option for solid or translucent blades that will either block or filter light coming into the room. Let Fashionline Vertical Blinds take your windows in a whole new direction.

Fashionline has developed a superior tracking system that ensures blades sit evenly in place and draw smoothly. Easy to clean and operate, simple easy-to-use fingertip controls rotate the blades through 180 degrees, while precision engineering allows for minimal light leakage between blades.

Perfect for Australian conditions.

Australians love the summer sun but we don't like the damage it can do to furnishings by fading carpets and upholstery. You need to protect your home from harsh sunlight and vertical blinds give you that versatility. Block the light and heat to save your décor and save on energy bills too. Over 30% of unwanted heat loss in winter and heat gain in summer takes place through windows, so efficient window coverings can provide substantial savings on heating and cooling costs.

Your local Fashionline dealer provides elegant and distinctive window furnishing concepts by combining the resources of Australia's largest independent blind manufacturing co-operatives.

Fashionline is the brand of an Australia-wide association of blind manufacturers who have created a range of timeless window furnishings solutions with the latest designs, colours and technology at an affordable price.
